Abstract (Font: Times New Roman, Size 11, Bold)

These short guidelines illustrate the formatting of the IJIFR paper and provide a template for each of the components. Included are layout information (margins etc), font and paragraphs, etc. Styles are supplied in the Word version of the template. Papers submitted for the Journal should not be under consideration for any other publication at the same time. A declaration should be made by the author in the covering letter that the paper is original and has not been published or submitted for publication elsewhere. The cover page should contain the title of the paper, author's name, designation

Keywords: Format, Layout, Fonts, Tables, Figures, References

1. INTRODUCTION (Font: Times New Roman, Size 12, Bold), Capitalize each Word

Authors are responsible for the quality of their paper and are kindly requested to strictly observe the following guidelines for the preparation and delivery of their camera-ready manuscripts. This will ensure that the proceedings have a consistent look from one paper to the next. We would ask you to assist us by following this template. Papers that do not adhere to these instructions may not be published. All submissions should be made electronically through the IJIFR website url <http://www.ijifr.org>. Authors should submit only papers that have been carefully proof read and polished. Before submission please make sure that your paper is prepared using the journal paper template. This will ensure fast processing and publication. Acceptance or rejection notification will be sent to all authors. Authors are requested to download the template of paper form paper template tag given in the home page.

1.1 Formatting (Font: Times New Roman, Size 11, Bold)(Level I Headings)

1,1.1 Page Formatting(Font: Times New Roman, Size 11, Bold) (Level 2 Headings)

The final document is to be provided in A4 format and in doc. or doc.x or standard non-encapsulated Postscript format. All four margins (top, bottom, left and right) should be 2.5 cm. Please do not go outside these margins as they will be used for binding and for the page numbering, which will be added later when the paper is placed into the proceedings. Please do not add page numbers yourself. After the title, abstract and keywords, the rest of the paper should be in single columns, with 1.15 cm spacing between the whole text. Large figures or tables may occupy the whole width of the page.

1.2 Font and Paragraph Formatting (Font: Times New Roman, Size 11, Bold) (Level 3 Headings)

Titles and headings should be in Times New Roman font (Bold) with the main body of the paper in Times New Roman. The details of each of the paper components are described here, with a summary provided in table 1.

2. TABLES, FIGURES AND EQUATIONS**Table 1: Font and paragraph formatting styles for various text elements**

Style	Apply to	Font	Size	Alignment	Spacing / Other
Title	Paper title (Sentence Case)	Tmes new Roman	20bold	Justified	Add space Before Paragraph Add Space After Paragraph 1.15
Authors	Author block Author's Name (capitalize Each word) Email:as per the email address	Tmes new Roman	16 11	Centred Centred	1.0 spacing Between author's details & emails Remove space after paragraph
Abstract Header	Abstract heading	Times new roman	12 bold	Left	Add space Before Paragraph Remove Space After Paragraph (1.15)
Keywords (plus Times new 12pt bold)	Keywords heading	Times new Roman	12 bold	Left, flowing straight into keywords	Add space Before Paragraph Remove Space After Paragraph (1.15)
Keywords	Keywords (capitalize each word)	Tmes new Roman	10	Left	
Heading 1	Level 1 headings, incl. acknowledgements and references	Tmes new Roman	11bold	Left	Add space Before Paragraph Remove Space After Paragraph (1.15)
Heading 2	Level 2 headings	Tmes new Roman	11bold	Left	Add space Before Paragraph Remove Space After Paragraph (1.15)
Heading 3	Level 3 headings	Tmes new Roman	11bold	Left aligned	(1.15)
Body	Abstract text; Main body text	Tmes new Roman	11	Justified	
Caption	Table and figure captions	Tmes new Roman	10 Bold	Centred	Add space Before Paragraph Remove Space After Paragraph Figure Caption Below the figure Table caption above the table
Table Text	Text within tables	Tmes new Roman	11	Left	
Equation	Equations	Tmes new	11	Left, with number on	

		Roman		right in parentheses	
Reference	References/ Literature Cited	Times New Roman	10	Justified; Numbering In [] Square Parenthesis	1.0 Remove Space After Paragraph

3. SPELLING, LANGUAGE AND CAPITALS

Please check your spelling carefully. If you are not a native English speaker, it is well worth asking a native speaker to proofread your paper for grammatical errors and awkward phrasing.

Use initial capital letters for the main paper title and for all section headings. However, captions for tables and figures should not have initial capital letters, except for the word “Table” or “Figure”, as in the example of table 1 above. Likewise, the keywords given below the abstract should not have capital letters, except for proper names.

In general, try to avoid excessive use of capital letters in the text as this makes your paper harder to read.

Where possible, tables, figures and equations should be placed within a single column, although larger items may span the width of the page. Figures and tables should be numbered sequentially and placed close to the point where they are referred to within the text, but should not break paragraphs or sentences. Tables or figures spanning the whole page should be placed either at the top or bottom of the page, as with table 1 above. The text within tables should be 10 point Times New Roman. If the table is very full the font size may be reduced, but should not be smaller than 8 points. Table borders should be simple ½ point lines (no double or bold lines). The outside of the table should be enclosed in a border, as with table 1. The header row of the table should be in bold type, not italic. Figures and graphs should also be large enough for the figure to be clear. Text within figures may be in either Times or Arial fonts, as appropriate for the figure. Font sizes should be between 9 points (to be legible) and 10 points (any larger will appear disproportionate compared to the rest of the paper). Table captions should appear above the table, and figure captions below the figure. The captions should be clear and simple, although sufficient information should be provided for the figure to be understood without further reference to the text.

Captions (table or figure) should be 10 point Times font, centred with the table or figure, and have 6 points spacing both before and after the captions. The words “Figure 1:” or “Table 1:” etc. should be in bold as shown in the example figures and tables in this document. The caption should end with a full stop.

Corresponding Author Name et al. (Year): Title of the Paper

Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1). First use the equation editor to create the equation. Then select the “Equation” markup style. Press the tab key and write the equation number in parentheses. To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Use parentheses to avoid ambiguities in denominators. Punctuate equations when they are part of a sentence, as in

$$\int_0^{r_2} F(r, \varphi) dr d\varphi = [\sigma r_2 / (2\mu_0)] \cdot \int_0^{\infty} \exp(-\lambda |z_j - z_i|) \lambda^{-1} J_1(\lambda r_2) J_0(\lambda r_i) d\lambda. \quad (1)$$

Be sure that the symbols in your equation have been defined before the equation appears or immediately following. Italicize symbols. Refer to “(1),” not “Eq. (1)” or “equation (1),” except at the beginning of a sentence: “Equation (1) is” Equations should appear in line with the text, and should be numbered sequentially in parentheses on the right. The equation number should be flush with the right margin. The style “equation” includes a right tab to place the number correctly. The normal size of variables within the equation should be 10 points, with appropriate changes in size for subscripts, superscripts, etc.

4.1 Cross-References

Figures, tables and sections should be referred to in the text as figure 1, table 1 or section 1, with no capital letter and with no abbreviation.

Equations may be referred to in the body (or in figure captions) by the equation number in parentheses, with or without the text “equation” (not abbreviated). For example, equation (1) relates the equivalence of mass and energy.

4.2 Positioning of Tables and Figures using Word

Tables that fit within a single column width should be inserted directly in the text - avoid using unnecessary text boxes.

Figures can be difficult to position however, as they are liable to move about.

Important Dates Regarding Monthly Publication

Last Date of Paper Submission Upto : 25th day of Every Month

Acceptance Notification : Within 5-10 days after peer Reviewed Process & Plagiarism Test

Final Paper Acceptance Notification: After Rigorous Evaluation Only

Final Online Publication of Papers: Till 30th day of Every Month

Figure 2: Important dates for Every Issue

If you draw the figure directly in Word, make sure the various parts are grouped together. Right-click on the (grouped) figure and under Format Object go to Layout and Advanced. On the text wrapping tab select top and bottom, and on the picture position tab select centred relative to column and absolute position 0.5cm below paragraph. Under Options select move with text, lock anchor, but not allow overlap. This combination generally keeps the figure in place.

5 ABBREVIATIONS AND ACRONYMS

Define abbreviations and acronyms the first time they are used in the text, even after they have already been defined in the abstract. Abbreviations such as IEEE, SI, ac, and dc do not have to be defined. Abbreviations that incorporate periods should not have spaces: write “C.N.R.S.,” not “C. N. R. S.” Do not use abbreviations in the title unless they are unavoidable (for example, “IEEE” in the title of this article). For a more complete listing of common abbreviations and acronyms please refer to Appendix II of http://www.ieee.org/portal/cms_docs/pubs/transactions/auinfo03.pdf

6 REFERENCE FORMATS

All references should be listed at the end of the paper, and numbered sequentially, within square brackets, in order of first appearance within the paper. For example, it is important to reduce power dissipation when designing a system [1]. Smith [2] describes the latest low power design techniques. References to web pages [3] is discouraged, but may be included if necessary. The Word style “Reference” in this template includes numbering with square brackets.

Please list *all* authors - do not use “et al.” in the references. Lists of authors should appear in this format: “A. White, B.J. Smith and J. Jones,” (no full first names; initials first; space between author initials and surname, but not between two initials; no comma before “and”; end the list with a comma). Use commas, rather than full stops, to separate the various parts of each reference.

Titles of books, theses, journals and proceedings should be in *italic* with initial capital letters, but titles of papers should not.

Titles of papers and chapters should be in normal text, in inverted commas, with no initial capital letters.

Use “smart” inverted commas as in this document, rather than “straight” ones.

Publication years should appear in parentheses (2005) at the *end* of each reference, with *no* comma preceding. Do not give months. Follow the parentheses with a full stop.

Page numbers should be in the format pp 25-30 (no dot after pp; no space between numbers and dash)

Books: give details in this order and format: Author Name(s), *Title in Italics with Initial Capital Letters* (3rd edition), Publisher, Place (year). Note that the place of publication should be a city, not a country.

Book chapters: give details in this format and order: Chapter Author(s), “Chapter title in normal text without initial capitals”, in Editor Name(s) (ed./eds), *Book Title in Italics with Initial Capitals*, Publisher, City of Publication, pp 23-45 (year). For example:

J. Smith, “New Concepts in Electronic Design and Testing”, in A. White and B. Black (eds), *The Book of Electronics*, Electronic Engineering Publishing, Sydney, pp 67-75 (2006).

Edited volumes: editor details go before publication details, as shown above.

Journal papers: please give details in this format and order: Paper Author(s), “Paper title in normal text without initial capitals”, *Journal Title in Italics with Initial Capitals*, volume (number), pp 25-30 (year).

Volume/number: please write volume 4 issue 2 as: *The Electron Devices Journal*, 4(2), pp 34-47 (2005).

Conference proceedings papers: please give details in this format and order: Paper Author(s), “Paper title in normal text without initial capitals”, *Proceedings Conference Title in Italics with Initial Capitals*, Location of Conference, pp 25-30 (year). The conference location should be a city not just a country. Please give page numbers, unless the proceedings are only available on CD. For example:

A. Jones, “My Excellent paper on Electronics”, *Proceedings 2nd IEEE International Workshop on Electronic Design, Test and Applications*, Perth, pp 25-30 (2004).
